

# Building Pathways

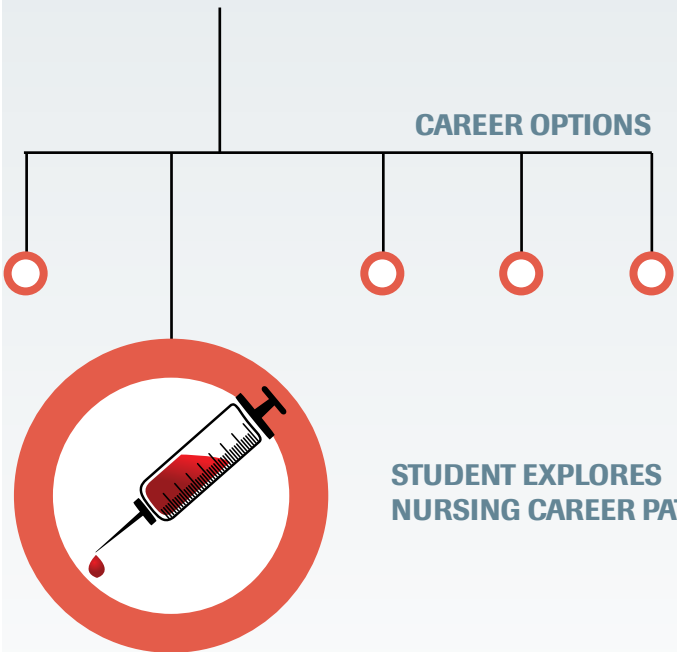

Typically, a student might have a career-exploration unit in 7th grade.

## STUDENT INTERESTS

Through an interest inventory, students answer a series of questions about their preferences for, say, working with people or numbers, indoors or outside. Their interests are matched with career clusters and pathways.

## CAREER OPTIONS

## STUDENT EXPLORES NURSING CAREER PATH

For example: When it came to planning high school courses, the student would be sure to take enough science credits. Perhaps he or she would even sign up for a dual-enrollment class in chemistry and anatomy at a local community college with the idea of transferring those credits to a university nursing program after graduation.
