

# NATIONAL PRICE TAG

A study estimated the transitional costs of implementing the common core in three areas: curriculum materials, assessments, and professional development. It estimated current state and national spending in those areas and projected the net cost or savings for the three approaches.

| State        | Current Expenditures<br>(millions) | NET COSTS                       |                          |                                       |
|--------------|------------------------------------|---------------------------------|--------------------------|---------------------------------------|
|              |                                    | Business as Usual<br>(millions) | Bare Bones<br>(millions) | Balanced Implementation<br>(millions) |
