## **Notes**

- 1 Pending additional eligibility review as appropriate.
- 2 PR# is a unique number used to identify and distinguish individual applications in the Department's internal system.
- 3 Applicant name and Project Title are directly excerpted from the application.
- 4 This link will take you to the proposed project's page on [www.data.ed.gov](http://www.data.ed.gov) where you can find specific information regarding the requested budget, absolute and competitive priorities addressed, project partners, and other helpful information.
- 5 Given the large volume of applications, panels, and reviewers in the Validation and Development categories, total scores for these applications were standardized, and this standardized score is noted here. However, the far more limited volume of applications, panels and reviewers in the Scale-Up category did not support standardization and therefore raw scores were used for these applications.
- 6 Although applicants were not required to do so at the time of application, some applicants chose to share that they had already secured their required private sector match. This column reflects that self-reported information. This column does not indicate that the applicant has provided the Department with the necessary supporting documentation, or that the Department has reviewed and deemed sufficient any documentation provided.
