NOTES:

- Figures in this column are adjusted to reflect regional cost differences and weighted for student needs. The national average for adjusted per-pupil expenditures is \$9,644.
- The Clark County school district enrolls the majority of students in Nevada, making its per-pupil spending the statewide median. In addition, Clark County is Nevada's lowest-spending district, with adjusted per-pupil expenditures of \$7,703. Because of these two factors, a value for the McLoone Index comparable to other states cannot be calculated. Nevada's grade is based on all other available indicators.
- The District of Columbia and Hawaii are single-district jurisdictions. As a result it is not possible to calculate measures of financial equity, which capture the distribution of funding across districts within a state. The District of Columbia and Hawaii do not receive grades for school finance.
- The District of Columbia does not have a state-level revenue source.
- The U.S. row reports the indicator value for the average state.
