

# WHAT IT TAKES: LINKING EDUCATION TO JOBS

According to figures from the U.S. Bureau of Labor Statistics and the Georgetown University Center on Education and the Workforce, the economy has moved away from careers that require less formal education, such as agriculture. Most jobs require more technical training than they did previously. The amount of education required in fields like medicine or aeronautics depends heavily on the particular career within that field that a student wants.

## EDUCATIONAL ATTAINMENT OF WORKFORCE FOR SPECIFIC JOBS

NOTE: Percentages may not add up to 100 percent because of rounding.
