

HOW WE GO BACK TO SCHOOL

Social Distancing: Making It Work

CHANGE HOW THE SPACE IS USED

- Repurpose large common areas like auditoriums or gyms to use as instructional spaces

- Designate rooms for health screening

- Remove furnishings to maximize capacity in all rooms

ATTEMPTED REVISION.....

HOW MANY
STUDENTS
CAN FIT IN A
CLASSROOM?

1) Measure and record room dimensions (width x depth)

2) Divide the available space by **44 square feet per person** to allow for students to have socially distanced space.

3) Reserve one of the available spaces for a teacher and another for an instructional aide, if necessary.
