  - Verbal Communication as a Cultural Variable .......................... 24
  - Nonverbal Communication as a Cultural Variable ..................... 26
  - To Sum Up ............................................................................... 29

**Chapter Two:**

**What We Know about Human Learning and Effective Instruction** .................. 31

  - Key Findings of the Research on Human Learning ..................... 31
    - The Brain Searches for Meaning ........................................... 31
    - The Brain is a Complex System ............................................ 32
    - There Are Many Ways to Be Intelligent ................................. 33
    - Learning is an Emotional Activity ....................................... 33
    - Learning is a Social Activity ................................................ 34
    - Metacognitive Skills Enhance Learning .................................. 34
What We Know About Good Teaching ............................................... 35
Effective Classroom Management ...................................................... 35
High Levels of Student Engagement ................................................. 37
Efficient Use of Time ........................................................................ 38
Teaching Styles and Learner Preferences ............................................. 44
Embedding Research on Teaching and Learning in Subject Area
Instruction ......................................................................................... 46

Chapter Three:
Culturally Sensitive Instruction ....................................................... 49
   Kamehameha Early Education Project (KEEP) ................................. 51
Teaching Heterogeneous Groups ......................................................... 53
Fears of Separation and Inequity ......................................................... 53

Chapter Four:
Culturally Sensitive Classrooms ....................................................... 55
   Taking the Next Step ....................................................................... 57
      Questions to Identify Cultural Practices that
      Influence Students’ Behaviors ...................................................... 58

Chapter Five:
Keeping Culture in Mind when Working with Families ................... 67
   Challenges to Family Involvement ................................................ 68
   The Additional Challenges of Culture ............................................. 69
      Family Learning Is Especially Important for
      Families with Language Challenges ............................................ 70
   Independence Versus Helpfulness ................................................. 73
   Parents’ Roles Versus Teachers’ Roles ........................................... 74
   How Teachers Can Make a Difference ........................................... 76

Chapter Six:
In Summary ...................................................................................... 81

References ......................................................................................... 85

Authors: Leona M. Johnson with the assistance of Nancy Protheroe.

Leona M. Johnson is a doctoral student in Educational Psychology at Howard University in
Washington, D.C., and is currently completing dissertation research on the topic of “Learning
Preferences of Students in Mid-Atlantic, Metropolitan, Elementary, Schools.” Other related work
includes a presentation on “Teaching Styles and Learning Preferences” at a Learning and Cognition
Symposium presentation on “Teaching Styles and Learning Preferences” at Howard University.

Nancy Protheroe is Director of Special Research Projects at Educational Research Service. She is
responsible for coordinating research and writing projects such as the What We Know About series and
has written on topics such as effective instruction, special education, and the characteristics of
successful schools and districts.
